Foreword

Romania goes through a process of transformation of higher education, both determined by applying the provisions of the National Education Law and the need for the involvement of higher education in achieving the objectives of European Strategy 2020. The goals of the European Union underline the fact that the European Higher Education Area and European Research Area are the main pillars of a Europe of knowledge.

A modern, transparent, flexible and efficient public administration, as a prerequisite for structural transformation of the Romanian society, requires mainly professionalizing the public system by attracting young professionals to civil service, trained and determined to implement the principles of modern public management and the values of the European administrative space.

In this context, the Faculty of Administration and Public Management aims to find solutions that address these challenges by updating and adapting innovative capacities to changes in the national and international socio-economic environment.

The journal "Administratie și Management Public" makes an important contribution to increasing the visibility of our faculty nationally and internationally and represents an example of our contributions for improving the quality of higher education in the field of administrative sciences within the Bucharest University of Economic Studies. Over the years, there have been published in the journal, studies and research papers of great novelty and value, submitted by specialists in administration and public management, both in academia and public institutions and authorities from Romania and abroad.

Professor Elvira NICA, Ph.D.

Dean of the Faculty of Administration and Public Management
