Faculty of Management  
Academy of Economic Studies Bucharest**

**Abstract:** This paper presents some of the results of an ample comparative study on public administration developed by the author. It contains five sections in which the main characteristics of the **public administrations models in Finland and Sweden** are looked at, a **comparative analysis** of the two is undertaken, on the basis of which **substantial advantages and means of know-how transfer** are identified, from the administrative systems of the Scandinavian states into that of Romania.
